Flutter Developer for Earnify Bole App

Develop a Flutter-based app to replicate the attached app's design and features. The app will fetch all its content from the WordPress API at https://blog.bolenav.com/wp-json/wp/v2**/XYZ**
Salary: 7,000 ETB, with flexibility for negotiation. The salary is kept moderate because we will have many similar projects (maybe with different subdomains and tasks) in the future together.

Project Details:

- App Name: Earnify Bole
- Package Name: com.bolenav.blog
- Version: 1.0.0
- Platform: Android
- API Source: Fetch data from https://blog.bolenav.com/wp-json/wp/v2**/XYZ**.
- Notifications: Integrate time-interval-based local notifications encouraging users to read posts.
- Design: Copy the UI of the attached image, ensuring clean, responsive layouts.
- Display ads between/in posts and in between different pages as shown on the image attached.

Expectations:

- Deliver the app within **2 to 3** weeks.
- Provide complete source code, app and signing key.
- Be available for future updates (maintenance fee applicable).

If this aligns with your skills and expectations, please let us know!
